

Increase the productivity of your cattle production with LED

In Sønderholm, near Aalborg, Ewald Kristensen, Sydgaarden, has achieved a saving of EUR 3.300 / year. Meaning the investment is paid back over 2.5 years. At the same time, the lighting is improved in the houses and less maintenance is required.

Avoid poor reproduction and achieve better animal welfare while saving money. LED luminaires and High bay lamps are made for animal houses. They can withstand larger amounts of dust and ammonia and can be high-pressure washed.

With RN Solutions specially developed light concepts for livestock farms you get:

- **Optimal lighting** with LED luminaires or High bay lamps
- **Easy installation** – With our price-efficient Plug’N Play™ solution, which can easily be installed by the farmer or the electrician. Or our luminaires for fixed installation, with PUSH IN clamps
- **Significant savings on electricity bills** - 50-80% per year, depending on the current light solution
- **Long-term solution:**
 - 2 – 7 years warranty, depending on the product
 - 50.000 hours lifetime
 - All equipment is waterproof and has a special-coating against ammonia
- **Products we recommend:**
 - RNS Plug’N Play™: **EASY + FARM-LIGHT + MODULARSYSTEM**
 - Fixed installation: **BASIC LED + PREMIUM LED**
 - High bay lamps: **EGGSHELL**
