

# Increase the productivity at your workshop with RNS LIFT-LIGHT

*Michael Smits, Støvring Tire Center, in northern Jutland has for several years used RNS Liftlight, from RN Solutions.*

*"It is very easy and quick to install. We save money and have a good working light under the cars as they stand on the lift" he says*

**Most mechanics know the problem. It is not easy to look under a car when it is on the lift. Flashlights help, but they are impractical.**

**RNS LIFT-LIGHT offers good lighting, WITHOUT BLINDING, and you have both hands free to work.**

**It provides enough light to be used on both 2 and 4 pos. lifts.**

**The working environment in a workshop needs to be good and efficient. Good lighting and easy maintenance are an important factor in this regard.**

**RNS industrial luminaires are secured against electronic disturbance and do not affect various electronic equipment.**

**They also withstand high pressure cleaning.**

With RN Solutions specially designed light concepts for lifts, you get:

- **Easy installation** - our price-efficient Plug´N Play™ solution, Easy to install by the staff or the electrician.
- **Long term solution:**
  - 2 year warranty
  - 50.000 hours lifetime
  - All equipment is waterproof + has special-coating against salt, acid, etc.
- **Products we recommend:**
  - RNS Plug´N Play™: **BASIC + MODULAR SYSTEMLIGHT**
