

Optimal lighting for enriched cages with RNS LED light

At René Meyhoff in Præstø in Sjælland, René installed dimmable LED lighting from RN Solutions. All light sources and cables are RNS Plug 'N Play™ system. All installed by the employees themselves.

Achieve better animal welfare and save money – all at the same time.

Poultry requires good lighting that is dimmable, and which does not flicker.

RNS LED POULTRY FARM-LIGHT dimmable luminaires is made especially for poultry where dimming without flicker has been the main focus. In addition, they are made for farm environments, which means that they can withstand ammonia, dust and high pressure washing. Built in transformer in every luminaire provides easy installation, reliability and a price efficient solution.

With RNS special designed light concepts for poultry farms you get:

- **Optimal lighting** with farm luminaires special made for poultry
- **Easy installation** - our price-efficient Plug 'N Play™ solution, which can easily be installed by the farmer or the electrician
- **Significant savings on electricity bills** - 50-80% per year, depending on the current light solution
- **Long-term solution:**
 - 2 year warranty
 - 50.000 hours lifetime
 - All equipment is waterproof and has a special-coating against ammonia
- **Products we recommend:**
 - RNS Plug 'N Play™: **POULTRY FARM-LIGHT - cages**
 - DIMMER 0-10V: **CEPU1500**
 - LIGHT CONTROL SYSTEM: **SUNRISE LIGHT CONTROL**
