

# Increase productivity in your sow production with LED lights

*In Tylstrup in Denmark, Henrik and Michael Basso have achieved a saving of Euro 2,500 / Year in one barn with an investment of 2,900 Euro. Unpacking and mounting of the lighting in the section took a total of 2.5 hours*

## Prevent seasonal infertility mitigation.

With RN Solutions SOW-LIGHT™ concept in A/I section – you achieve:

- Stronger heat
- Less sows not coming into heat
- Higher farrowing rate, + 2 - 5% point
- Higher litter size + 0,3 - 1 extra piglet
- ROI (return of investment) 3 Month

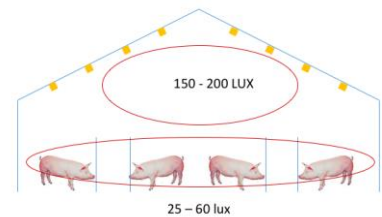

## We can offer:

- **Optimal lightning**, our Farm Lights mounted directly above the head of the Sows = 200 - 400 Lux and in the right light spectrum
- **Price Effective Plug´N Play™ solution**, which easily can be installed by the Farmer, without consulting an electrician
- **Significant savings on electricity bills** – typical 50-60% per year, depending on the current light solution
- **Long-term solution:**
  - 2-Years Warranty
  - 50.000 hours lifetime
  - All equipment is waterproof and has a special coating against ammonia

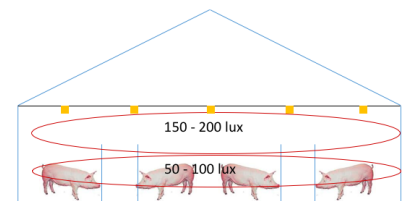

The SOW-LIGHT™ concept consists of RNS FARM-LIGHT or RNS MODULAR-LIGHT LED Luminaires. See data sheet for technical info.

(USA and Canada: see data sheet for DANISH FARM-LIGHT),
