

# Increase the productivity at your workshop with LED-Light

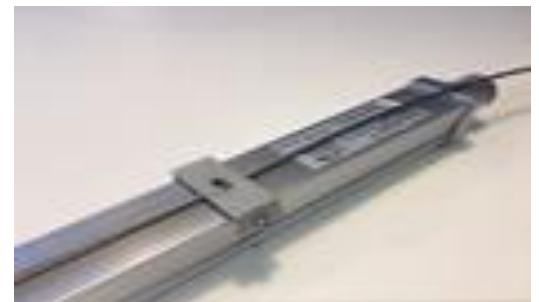

*On Maskingarden, near Nibe in Northern Jutland, Kurt Nielsen, has been using LED fixtures from RN Solutions for several years. "It is very easy and quick to install yourself. We save money and furthermore we now have great work light. The only problem is that, it is too dark in the places where we didn't change the light yet." – He says.*

**In a workshop there is often busy, and many people work closely together in a small area. Therefore, the work environment must be suitable. Lighting and maintenance are an important factor in this regard. The RNS Industrial Lights is well-assured of "Electronic noise" and does not affect various equipment. It also withstands high pressure cleaning.**

With RN Solutions special designed light concepts for workshops, you get:

- **Easy Installation** – our price-efficient Plug´N Play™ solution, easy to install by staff or the usual electrician.
- **Significant savings on electricity bills** – typically 50-80 % per year, depending on the current lighting solution
- **Long-term solution:**
  - 2 – 7 years warranty
  - 50.000 hours of service life
  - All equipment is waterproof and has a special coating against salt etc.
- **Produkter, vi anbefaler:**
  - Plug´N Play™:
  - Fixed Installation:
  - High Bays:
